ARIYA SARRAFZADEH

Senior Technical Product Manager | Fintech & Platform Innovation

Tehran, Iran (Open to Relocation: Dubai, UAE / Remote) | +98 912 311 7965 | ariasg2002@gmail.com | linkedin.com/in/ariya-sarrafzadeh-2b505141

PROFESSIONAL SUMMARY

Senior Technical Product Leader with 15+ years of experience architecting, building, and operating high-availability fintech and data platforms for user bases exceeding 45 million. Proven authority in bridging executive business strategy and deep engineering execution across Payments, Fraud Prevention (AML), and National Regulatory Compliance (FATA/Shaparak). Demonstrated track record of scaling multi-petabyte data architectures, launching enterprise API gateways, reducing fraud reporting timelines by 96%, and maintaining 99.99% operational reliability across complex multi-party systems.

CORE COMPETENCIES

Strategic Product Leadership: Technical Product Management (TPM), New Product Development (NPD), Product Lifecycle Management (PLC), Technical Roadmapping, Agile/Scrum Leadership, Enterprise PRDs & System Architecture.

Fintech & Regulatory Domain: Fraud Detection & AML Architecture, Payment Workflows (C2C, Digital Wallets, Payment Gateways), Multi-Party Financial Reconciliation, PSP & Open Banking Integration, FATA & Shaparak Compliance.

Architecture & Data Engineering: High-Availability Monitoring (Prometheus, Grafana), Distributed Log Analytics (Grok), High-Throughput APIs & Microservices, Multi-Petabyte Databases (Elasticsearch, Parquet, Python), Identity & UAA Systems.

PROFESSIONAL EXPERIENCE

Senior Technical Product Manager
Apr 2025 – Present

Persia Fava Gostaresh (P.G IT Solutions)
Tehran, Iran

- Architected the business plan and 12-month technical roadmap for the enterprise "Shenasa" API Gateway, scaling the platform to aggregate 30+ national identity, KYC, and open banking endpoints (Sanbod, Yekta, Tosan).
- Led engineering of a multi-petabyte 'Smart DB' for high-precision targeted marketing, deploying Python data pipelines that convert multi-GB datasets into Parquet format for sub-second Elasticsearch querying.
- Spearheaded technical architecture and compliance readiness for high-stakes enterprise tenders (e.g., Digikala), establishing specifications for high TPS capacity, active-passive failover mechanisms, and zero-trust API security.
- Designed end-to-end architecture for User Authentication & Authorization (UAA) microservices and spearheaded product definitions (PRDs) for new enterprise communication platforms (Feresta bot).
- Served as principal technical liaison between executive leadership and cross-functional outsourced teams (Backend, Frontend, UI/UX, Infrastructure) to enforce delivery SLAs and scope integrity.

Senior Payments & Fraud Consultant
Jul 2018 – Apr 2025

Digikala (Parent Company)
Tehran, Iran

- Safeguarded nationwide e-commerce infrastructure supporting 45+ million active users as Senior Subject Matter Expert (SME) across payment processing, fraud detection, and transactional risk.
- Engineered an omnichannel response and dispute resolution workflow, reducing incident resolution time from 48 hours to under 45 minutes (98% reduction).
- Negotiated regulatory protocols directly with Iran's Cyber Police (FATA) to overcome legal bottlenecks, establishing operational frameworks that enabled 3-hour nationwide express delivery.
- Formulated rapid-response asset recovery protocols, slashing recovery times for high-value compromised assets from multiple days to under 1 hour.
- Resolved multi-party financial discrepancies with 100% accuracy across 3-dimensional transactional flows, eliminating legacy reconciliation blindspots.

Senior Tech-Ops Analyst / Administrator
Jul 2018 – Apr 2025

Digipay Co. (Digikala Group)
Tehran, Iran

- Slashed official fraud reporting turnaround to law enforcement by 96% (from 3 days to under 3 hours) by designing automated data-tracing pipelines and standardized reporting workflows.
- Directed judicial inquiry operations autonomously, successfully resolving a 30,000+ case backlog and elevating regulatory compliance satisfaction from 20% to 98%.
- Architected the company's first enterprise monitoring stack using Prometheus and Grafana, increasing operational incident detection and reaction speed by 80%.
- Served as 24/7 technical incident commander between customer operations, engineering, and C-level executives, translating complex deep-system logs (Grok) into root-cause traces in under 3 minutes.
- Designed multi-party financial reconciliation engines for Wallets, C2C transfers, Insuretech, and Lendtech products prior to engineering implementation.

Founding Operations Analyst / Administrator
Sep 2016 – Jun 2018

Homapay Co.
Tehran, Iran

- Scaled startup operations as one of the first 10 employees, independently running platform monitoring, transaction auditing, and operational support.
- Maintained platform stability and financial flow integrity across C2C, top-up, and billing systems, facilitating a 3x increase in investor valuation and successful acquisition by Digikala Group.

Regional Sales Manager
May 2010 – Dec 2016

GD Retail Sell
Tehran, Iran

- Directed a regional commercial division of 30+ representatives with full P&L accountability, consistently exceeding sales targets.
- Managed international partner communications, contract negotiations, and logistics coordination as primary bilingual liaison.

Founding CEO / Managing Director
Sep 2005 – Nov 2012

Aida Faraz Gostaresh
Tehran, Iran

- Founded and scaled an IT infrastructure and software consultancy, managing an active client portfolio of 15+ corporate accounts.
- Architected and deployed hybrid network infrastructures (Linux, Windows Server), security boundaries, and disaster recovery strategies.

EDUCATION

Bachelor of Science (B.S.) in Software Engineering
Tehran, Iran

Islamic Azad University, South Tehran Branch

TECHNICAL SKILLS SUMMARY

Methodologies & Management: Agile, Scrum, Kanban, NPD, PLC, SLA & Incident Management, Technical Roadmapping.

Data & Query: Elasticsearch, Apache Parquet, Python (Data Engineering & Automation), Grok, SQL, PostgreSQL, MongoDB.

Infrastructure & Systems: Prometheus, Grafana, Linux Systems Administration, API Gateway Design, Microservices, UAA.

Tools & Platforms: Jira, Confluence, Git, Postman, Enterprise Architect, Asana, Sing-box / Xray Network Stack.
