Hiring Manager

SellAnyCar.com

Dubai, United Arab Emirates

RE: Application for Product Manager Position

Dear Hiring Team,

I am writing to express my strong interest in the Product Manager role at SellAnyCar.com. As a Senior Technical Product Leader with over 15 years of experience architecting high-availability platforms and managing complex, trust-based transactions for over 56 million users, I see a powerful alignment between my background and SellAnyCar.com's mission to simplify and speed up the car selling process.

My career has been defined by removing friction from complex operations. At Digipay (part of the Digikala Group), I didn't just manage products; I architected the entire fraud and compliance vertical from the ground up. I reduced critical regulatory reporting times from 3 days to under 3 hours through automation—a direct parallel to SellAnyCar.com's promise of a "30-minute" transaction. I understand that in your business, speed and trust are the product.

Specifically, I bring three core strengths to your team:

- **Scalable Architecture for High Volume:** I have architected monitoring stacks (Prometheus, Grafana) and data pipelines that handle millions of daily transactions with 99.99% uptime. I can ensure your platform scales seamlessly as you expand across the GCC.
- **Complex Operations Digitization:** I specialize in taking manual, offline processes (like vehicle inspections or paperwork) and transforming them into seamless digital workflows. I have done this for national-level payment networks and fraud systems.
- **Data-Driven Decision Making:** Currently, I am leading the development of a multi-petabyte 'Smart DB' using Elasticsearch to enable advanced customer segmentation. I build the tools that allow businesses to make decisions based on data, not intuition.

I am eager to bring my "builder's mindset" and deep technical expertise to SellAnyCar.com. I am looking for a role where I can not only manage the roadmap but also drive the architectural innovation required to maintain your market leadership.

Thank you for your time and consideration. I look forward to the possibility of discussing how I can contribute to your continued success.

Sincerely,
