 - API Design & Microservices

LANGUAGE

- Persian: Native
- English: Full Professional

INTERESTS

- Traveling & Books
- Board & Role-playing Games
- Movies, Music, & TV Series
- Meeting Positive People

Profile

Senior Technical Product Leader with 15+ years of experience architecting, building, and operating high-availability fintech platforms. My expertise is at the intersection of product innovation, technical operations, and deep domain expertise in payments, fraud, and national-level compliance.

I am a systems-thinker who thrives on building new products from the ground up, from initial flow creation and reconciliation logic to architecting monitoring stacks (Prometheus, Grafana, ELK) and fraud-detection patterns. I have a proven history of acting as the sole point of contact for complex technical, legal, and governmental challenges, translating business goals into resilient and scalable systems.

Experience

- APR 2025 - PRESENT**
 - Senior Technical Product Manager**
P.G IT Solutions / Persia Fava Gostaresh, Tehran
 - Architecting a new multi-million dollar business plan for an API gateway, defining the complete 12-month roadmap, PRDs, and technical epics.
 - Leading the development of a multi-petabyte 'Smart DB' for SMS advertising, using Elasticsearch to enable complex, text-based query segmentation (75% complete).
 - Designing the end-to-end architecture for a new User Authentication & Authorization (UAA) microservice to standardize identity across all products.
 - Act as the single point of command and technical liaison between the CEO and all outsourced development teams (Backend, Frontend, UI/UX).
- JUL 2018 - APR 2025**
 - Senior Payments & Fraud Consultant (Concurrent Role)**
Digikala (Parent Company), Tehran
 - Acted as the senior subject-matter expert for Digikala's 45-million-customer platform, advising finance, logistics, and legal teams on fraud and payments.
 - Single-handedly built and managed complex reconciliation reports for the main platform, correlating data from multiple payment sources where internal teams failed.
 - Developed rapid-response fraud interception plans; personally traced high-value stolen items in under 1 hour, interfacing with law enforcement.
 - Consulted with Iran's Cyber Police (FATA) on behalf of Digikala, successfully negotiating new national regulations for 3-hour delivery systems.

JUL 2018 – APR 2025

Senior Tech-Ops Analyst / Administrator

Digipay Co. (Digikala Group), Tehran

- Owned and operated the entire Fraud & Judicial (Iran's Cyber Police - FATA) vertical for 7 years as a "one-person division," managing a 10-year caseload of over 30,000 inquiries for a 56M-user base.
- Served as the company's sole technical expert in 30+ judicial fraud cases, personally tracing money-laundering paths and training FATA officers on how to trace data.
- Reduced official fraud reporting time to FATA from 3 working days to under 3 hours by building new automated data-tracing and reporting flows.
- Dictated technical specifications and reconciliation patterns to external PSPs and Iran's National Payment Network (Shaparak), forcing them to build new services.
- Engineered the company's first logging standards (Grok) and search patterns, acting as the only engineer capable of deep-log debugging for 2+ years.
- Architected the company's first monitoring stack (Prometheus, Grafana) and owned all monitoring for the Superapp, Wallet, and Payments verticals.

SEP 2016 – JUN 2018

Founding Operations Analyst / Admin (Startup Team)

Homapay Co., Tehran

- Joined as one of the first 10 employees, single-handedly managing all operations, monitoring, and support for the initial 15-person startup.
- Manually operated and debugged all fintech platforms, masking severe code deficiencies to maintain a flawless operational record.
- My operational stability was a key factor in securing a 3x increase in investor funding, growing the team to 50+, and enabling the company's acquisition by Digikala.

MAY 2010 – DEC 2016

Mid Sales Area Manager

Gd Retail Sell, Tehran

- Directed a sales division of 30+ agents, holding full P&L responsibility for the area.
- Served as the sole translator and communications lead for international partners, negotiating contracts and aligning supply chain logistics.

SEP 2005 – NOV 2012

CEO / Board Member / Agent

Aida Faraz Gostaresh, Tehran

- Founded and led an IT solutions consultancy, acquiring and managing a portfolio of 15+ SME clients.
- Architected, deployed, and administered mixed-network infrastructures (Windows, Red Hat) for all clients.

Education

OCT 2001 – JUN 2006

B.S. Software Engineering

Islamic Azad University, South Tehran Branch
