SUMMARY

Senior Technical Product Leader with 15+ years of experience architecting, building, and operating high-availability fintech platforms. My expertise is at the intersection of product innovation, technical operations, and deep domain expertise in payments, fraud, and national-level compliance. I am a systems-thinker who thrives on building new products from the ground up—from architecting multi-million dollar business plans and petabyte-scale data platforms to defining technical roadmaps for core services like API gateways and UAA systems. I have a proven history of acting as the sole point of command for complex technical, legal, and governmental challenges, translating high-level business goals into resilient and scalable systems.

EXPERIENCE

*P.G IT Solutions / Persia Fava Gostaresh, **Senior Technical Product Manager***

Apr 2025 - Present

Architecting a new multi-million dollar business plan for an API gateway, defining the complete 12-month roadmap, PRDs, and technical epics. Leading the development of a multi-petabyte 'Smart DB' for SMS advertising, using Elasticsearch to enable complex, text-based query segmentation (75% complete). Designing the end-to-end architecture for a new User Authentication & Authorization (UAA) microservice to standardize identity across all products (nearing fruition). Act as the single point of command and technical liaison between the CEO and all outsourced development teams (Backend, Frontend, UI/UX).

*Digikala (Parent E-commerce Company), **Senior Payments & Fraud Consultant (Concurrent Role)***

Jul 2018 - Apr 2025

Acted as the senior subject-matter expert for Digikala's 45-million-customer platform, advising finance, logistics, and legal teams on fraud and payments. Single-handedly built and managed complex reconciliation reports for the main platform, correlating data from multiple payment sources where internal teams failed. Developed rapid-response fraud interception plans; personally traced high-value stolen items in under 1 hour, interfacing with law enforcement. Consulted with Iran's Cyber Police (FATA) on behalf of Digikala, successfully negotiating new national regulations for 3-hour delivery systems.

*Digipay Co. (Digikala Group), **Senior Tech-Ops Analyst / Administrator***

Jul 2018 - Apr 2025

Owned and operated the entire Fraud & Judicial vertical for 7 years as a 'one-person division,' managing a 10-year caseload of over 30,000+ inquiries for a 56M-user ecosystem. Served as the company's sole technical expert in 30+ judicial fraud cases, personally tracing money-laundering paths and training government (FATA) officers. Reduced official fraud reporting time to Iran's Cyber Police (FATA) from 3 working days to under 3 hours by building new automated data-tracing and reporting flows. Dictated technical specifications and reconciliation patterns to external PSPs and Iran's National Payment Network (Shaparak), forcing them to build new services. Architected and built 4-6 new internal SaaS platforms from the ground up, creating all technical flows, reconciliation logic, and processes in an undisciplined 'greenfield' environment. Engineered the company's first logging standards (Grok) and acted as the only engineer capable of deep-log debugging for 2+ years. Architected the company's first monitoring stack (Prometheus, Grafana) and owned 24/7 reliability for the Superapp, Wallet, and Payments verticals.

*Homapay Co., **Founding Operations Analyst / Admin (Startup Team)***

Sep 2016 - Jun 2018

Joined as one of the first 10 employees, single-handedly managing all operations, monitoring, and customer support for the initial 15-person startup. Manually operated and debugged all fintech platforms (C2C, billing, top-up), masking severe code deficiencies to maintain a flawless operational record. Operational stability was a key factor in securing a 3x increase in investor funding, growing the team to 50+, and enabling the company's acquisition by Digikala.

*Gd Retail Sell, **Mid Sales Area Manager***

May 2010 - Dec 2016

Directed a sales division of 30+ agents, holding full P&L responsibility for the area. Served as the sole translator and communications lead for international partners, negotiating contracts and aligning supply chain logistics.

*Aida Faraz Gostaresh, **CEO / Board Member / Agent***

Sep 2005 - Nov 2012

Founded and led an IT solutions consultancy, acquiring and managing a portfolio of 15+ SME clients. Architected, deployed, and administered mixed-network infrastructures (Windows, Red Hat) for all clients.

EDUCATION

SKILLS

Product & Innovation • New Product Development (NPD) • Technical Business Planning (PRD, Epics) • Product Lifecycle Management (PLC) • Technical Roadmapping • Agile/Scrum Leadership • Fintech & Payments • Fraud Detection, AML & Risk • Payments Architecture (C2C, Wallet) • Multi-Party Reconciliation
